PROFESSIONAL SUMMARY

AI-native Product Manager with 2 years of experience across enterprise SaaS, agentic AI platforms, and B2B procurement workflows. Proven in end-to-end product delivery - from discovery, requirements elicitation, and PRD documentation to sprint coordination, UAT, and post-launch KPI tracking. Hands-on practitioner of AI-assisted development - leveraging LLM tools (ChatGPT, Claude) and low-code platforms (Lovable, Bolt, Cursor) to independently build, test, and iterate functional MVPs for rapid experimentation. Adept at translating enterprise business pain points into user stories, functional specs, and roadmap inputs - bridging business stakeholders and engineering teams across Agile/Scrum delivery cycles. Comfortable operating in ambiguous, fast-moving environments and working directly with LLM APIs including OpenAI API to prototype and validate AI-first solutions.

WORK EXPERIENCE

Johnson Controls

Sep 2025 – Mar 2026

Senior Analyst

- Acted as execution-side product owner for a Supplier Performance Management SaaS implementation, partnering with Infosys to bridge business and engineering across the full delivery lifecycle.
- Defined requirements for deterministic and AI-driven workflow automation initiatives spanning supplier onboarding, compliance tracking, and performance reporting - translating business rules into structured specs for engineering execution.
- Defined and tracked KPIs covering SLA adherence, supplier quality, and compliance - directly contributing to a 20% improvement in SLA adherence post-deployment, presented as measurable ROI to leadership.
- Built Power BI dashboards from scratch to maintain real-time visibility across 100+ deliverables, reducing reporting turnaround time by 40%.
- Conducted UAT cycles to validate builds against acceptance criteria, annotated Figma designs for UX feedback, and facilitated monthly governance reviews to surface delivery risks proactively.

Kitaabh Technologies Pvt Ltd

Feb 2025 – Jun 2025

Product Consultant

- Conducted structured voice-of-customer sessions with enterprise clients to surface usability friction and adoption barriers - translating insights into actionable roadmap inputs for engineering and product teams.
- Coordinated end-to-end design and PoC deployment of a WhatsApp-based AI assistant powered by OpenAI API - defining conversational flows, authoring prompts, configuring business rules, and establishing guardrails for GST, invoicing, and reconciliation queries - reaching 100+ pilot users and measuring a ~25% reduction in support queries.

People Tech Group (Quest Global)

Jan 2024 – Dec 2024

Solution Partner – Product Development

- Supported BA-led execution for an agentic AI procurement platform spanning sourcing, contracts, and supplier workflows - working across 4+ enterprise client engagements.
- Gathered and documented requirements for LLM-powered document processing and contract generation workflows - contributing to a ~30% reduction in manual drafting effort across pilot deployments.
- Conducted 15+ client discovery calls with enterprise procurement stakeholders, translating voice-of-customer insights into user stories, functional specs, and PRD inputs to inform roadmap prioritisation.
- Coordinated and tracked delivery of 15+ feature releases via Jira - managing backlog grooming, sprint planning, and release documentation in Confluence to ensure on-time, scope-aligned delivery.
- Participated in feedback and evaluation cycles to assess LLM and agentic AI model performance - flagging quality gaps, contributing prompt refinements, and surfacing inputs to improve automation accuracy and HITL workflows.

SKILLS

Product Management: Requirements Elicitation, User Stories & Acceptance Criteria, PRD Documentation, Backlog Management, Sprint Planning, Feature Prioritization, UAT & Go-Live Readiness, Product Roadmapping, Agile/Scrum, SDLC

AI & LLM Tools: Generative AI, Agentic AI, Conversational AI, LLM APIs, OpenAI API, Prompt Engineering, ChatGPT, Claude, Lovable, Bolt, Cursor

Technical Tools: SQL, Power BI, Jira, Confluence, Figma, Miro, ServiceNow, MS Excel, REST APIs, PowerPoint

Domain: Enterprise SaaS, B2B Products, Procurement & Supplier Management, Workflow Automation, Digital Transformation

Core Competencies: Stakeholder Management, Cross-Functional Collaboration, Voice of Customer, Discovery & Solution Design, Structured Problem Solving, Vendor Coordination

EDUCATION

Post Graduate Diploma in Management (Healthcare Management)

2021 – 2023

Goa Institute of Management

Bachelor of Arts (Political Science, Economics, Sociology)

2016 – 2019

Mount Carmel College

Product Management Certification (In Progress) - Product School
